ORLAN

Artist's synopsis

ORLAN (Saint-Étienne, France)

"I AM ORLAN, AMONG OTHER THINGS AND AS FAR AS POSSIBLE. EVERY LETTER OF MY NAME IS WRITTEN IN CAPITAL LETTERS BECAUSE I DON'T WANT TO BE PIGEONHOLED"

ORLAN is one of the most internationally influential French artists.

She is not bound by any material, technology or artistic practice. She uses sculpture, photography, performance, video, 3D, video games, augmented reality, artificial intelligence and robotics (she has created a robot in her own image that speaks with her voice), as well as scientific and medical techniques such as surgery and biotechnology, to question the social phenomena of our time from a critical distance.

ORLAN has created the Art-Accès Revue en minitel. ORLAN founded and organised the Lyon International Symposium on Performance and Video.

ORLAN constantly and radically changes the given, breaking conventions and prefabricated thinking. He opposes natural, social and political determinism and all forms of domination, male supremacy, religion, cultural segregation and racism.
